About the Conference

The last few decades have witnessed tremendous changes in the financial arena worldwide. To keep pace with the ever evolving business environment, dynamism in finance is required. In such a scenario, innovations in financial practices become imperative. The Conference on Innovative Financial Practices, thus, aims at providing a platform to bring together academicians and practitioners with research interests in the field of finance and enable them to exchange ideas on the new developments in financial practices and techniques.

The conference provides a forum for disseminating research findings, practices and techniques in finance among academicians and practitioners through publication of quality papers in the Conference Proceedings bearing an International Standard Book Number (ISBN). A few selected quality papers will be published in International Journal of Management Research (published by Apeejay School of Management, in collaboration with Philadelphia University, Philadelphia, USA) and in the Apeejay Business Review (bi-annual journal of Apeejay School of Management), New Delhi. Papers that have already been accepted or are currently under review for other conferences or journals will not be considered for publications at CIFPD 2011.
