

AIT SAP e -LEARNING INITIATIVE

An initiative of e-Learning at Apeejay School of Architecture & Planning.

Our Institution was selected by AKTU being a pioneer Architecture Institute in U.P. to provide quality e teaching / learning platform for all architecture

students in colleges under the flagship of AKTU.

Teachers used time during the National lockdown to conduct classes during the day. They worked overtime to prepare presentations which they share online with the students. The students' work is reviewed by senior faculty before they are sent.

Google Classroom is one of the medium of instructions. All students notify their presence and make submissions. The submissions are then checked and marks given.

Extra support is provided to the students by making them understand the relevance of this medium and how this is the need of the hour. This is done through student initiative groups and phone message or calls.

The class co-ordinators ensure that students join the class. All teachers taking the class notify the class progress to class coordinators who maintain the records.

Attendance is taken only for those who submit assignment during online teaching /

e-Learning – A dedicated team under a professor is instructing teachers and educating them on making videos.

Students subscribe to the YouTube channel and the minute a new lecture is uploaded, they get notified.

We are working towards a comprehensive e-Learning platform while conducting classes.

Our endeavour is to give our students ample opportunities to continue to excel and be at par with the best.

An idea whose time has come.
