COA Code : UP03

Dear Parent,

In continuation to the advisory for Prevention from Novel Corona Virus dated January 28,2020, we reiterate our concern about the spread of the corona virus (COVID-19). We want you all to know that the school is closely monitoring this situation and working to ensure that all of our students, staffs and families stay safe and healthy.

As you know, at this point, a few cases have been reported in Delhi and NCR, currently, our school's responses are focused primarily on emphasizing general illness prevention and containment within families and at school.

In the meantime, it's important to remember preventive measures for good health and safety, like frequent and thorough hand washing with soap or using alcohol based hand sanitizer, avoiding close contact with anyone who has fever and cough, keeping kids with fevers and flu-like symptoms home, and being protective of others when coughing and sneezing.

We are deeply committed to keeping everyone in our community safe and healthy and will share any additional information as soon as it becomes available.

In case your child or any member of the immediate family has travelled to any other country affected by corona virus, please bring it to the notice of the school immediately.

Let's all be safe!

Kind regards,

Director
