- Q9. Extension of a template in Kompozer is :**  
a) .tmp                                      b) .temp                                      c) .mzt                                      d) . tp

Q27. Name and explain three options available for editable area, while creating Templates 3

Q28. Write HTML Code for the website with following output. Incorporate specific points about the website are mentioned below the output in HTML CODE 4

## Disaster Management

---

### Disaster Management Information

---

Disaster management is the process by which we prepare for facing disasters. It is how we cope with impacts of a given disaster

Prevention of the threat of any disaster

Reduction of risk of any disaster

Readiness to deal with any disaster

The diagram illustrates the Disaster Management Cycle as a circular process. It consists of seven stages: Preparedness (top), Disaster (top-right), Rescue/Relief (right), Rehabilitation (bottom-right), Reconstruction (bottom), Planning (bottom-left), and Mitigation (left). Each stage is represented by a colored box, and they are connected by a circular arrow. The text 'Disaster Management Cycle' is centered in the middle of the cycle. A watermark 'Adda247' is visible in the top right corner of the diagram area.

- a) Disaster Management should be displayed in the title bar
- b) Background image “dmacycle.gif” should be displayed in the webpage
- c) Colour of the text should be “Green”
- d) Margin from left should be 30
- e) “Disaster Management Information” should be written using largest heading
