SECTION D
CASE STUDY BASED
This section has 2 questions

Akash is diagnosed with a disability. This disability manifested in terms of difficulty in the acquisition of learning, reading, writing, speaking, reasoning, and mathematical activities. The sources of such disorders are inherit in the child. It is presumed that these difficulties originate from problems with the functioning of the central nervous system. It may occur in conjunction with physical handicaps, sensory impairment, intellectual disability or without them. It must be noted that disability may be observed as a distinct handicapping condition in children of average superior intelligence adequate sensory motor systems and adequate learning opportunities. If it is not remedied it may continue throughout life and effect self-esteem, vocation, social relation and daily life activities.

11. After reading the whole passage, identify and define the disability of Akash? 2

12. How can we identify children having the same disorder as Akash? 2
